### 1. 教學目標

This comprehensive course presents in-depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross-cutting and integrated national and regional ocean policy. This course highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and the outcomes of the 1992, 2002, and 2012 sustainable development summits. The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated, precautionary, and anticipatory. Overall, the course provides a definitive state-of-the-art review and analysis of national and regional ocean policies around the world.

### 2. 教學綱要

This course is on the development and implementation of integrated ocean policies at both the national and regional levels.
